

Position

Software .NET Developer

CRW Systems, Inc., a developer of software applications for state and local government agencies nationwide, is seeking a Software Engineer for our San Diego, CA office.

Headquartered in San Diego, CA and with office in St. Petersburg, FL, CRW Systems is a leading software developer and systems integrator that has been providing information management solutions to municipal agencies nationwide since 1991. TRAKIT is a suite of comprehensive software applications designed to streamline workflow within Building, Planning, Licensing, Enforcement and Public Works departments. These applications provide the mechanisms to create, issue, and track any type of development, permit, code violation, or license record associated with city and county governments.

The ideal candidate for this position must have the ability to adhere to established design and coding conventions, experience maintaining and preserving backward compatibility, good technical and customer support experience, and the ability to communicate clearly and effectively with clients. The candidate must be self-motivated, with the ability to get up to speed quickly.

Responsibilities

- Must be good with team development practices and communication skills.
- Reports directly to the Director of Software Development on project status.
- Travel is not required.

Desired Skills and Qualifications

- Degree from an accredited University in either Computer Science or Software Engineering.
- Object Oriented Programming in .NET.
- Visual Basic .NET and Windows Forms.
- SQL Server and Oracle database programming and administration.
- JavaScript.
- Experience with Crystal Reports desirable.
- Must be able to demonstrate knowledge, experience, and work at interview.

About CRW

CRW Systems, based in San Diego, CA, is a leader in the development of integrated software solutions for local government municipalities. CRW's main product, TRAKIT, is designed to automate permitting, inspections, code enforcement, planning & zoning activities, GIS, licensing, and other land management functions.

Benefits Offered

- Salary commensurate with job performance and results; bonus potential
- Health/Dental/Life insurance
- Two weeks vacation beginning first year (one week earned per 6 months service)
- Standard holidays
